

Restaurant Rating System

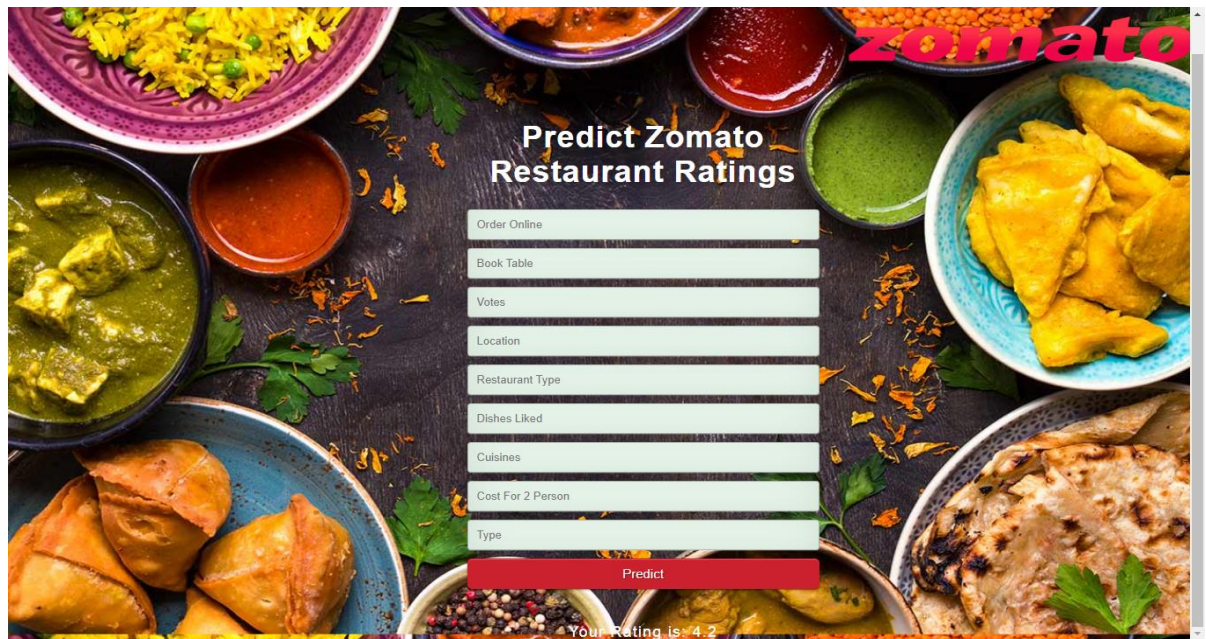

Wireframe Documentation

Arnav Saini

Homepage

We have divided Restaurant Rating system into Two Sections: -

1. First thing anyone will see is a pop-up window on Homepage which will ask for User Inputs like what are the facilities provided by the restaurants and what is the location of the reastaurants.

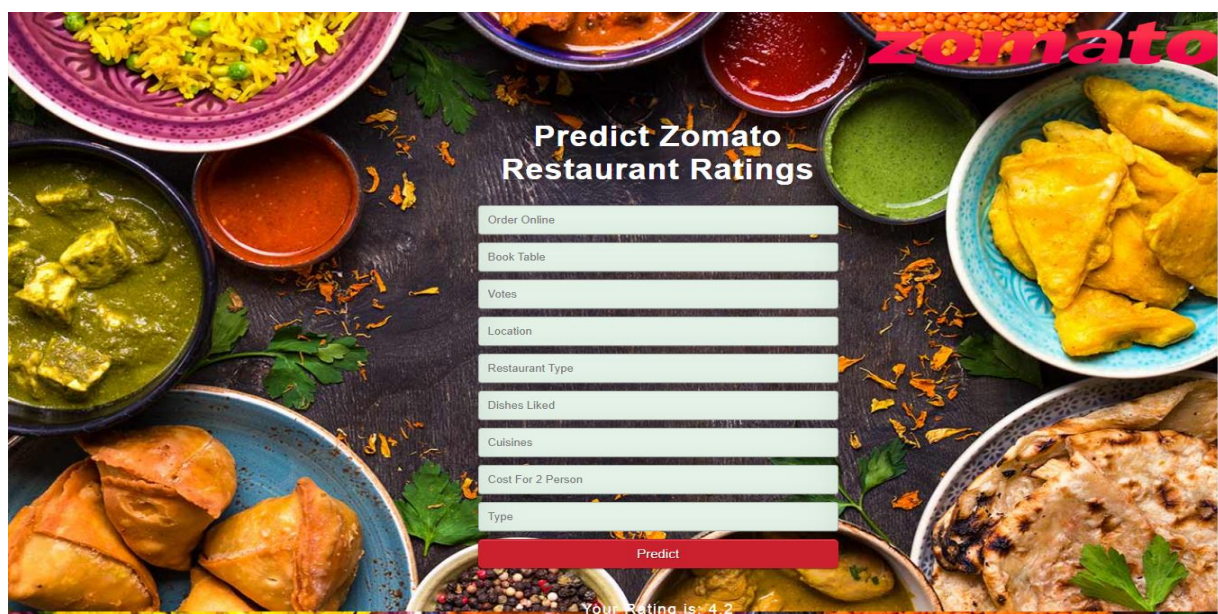

The screenshot shows a web form titled "Predict Zomato Restaurant Ratings" overlaid on a Zomato homepage background featuring various Indian dishes. The form includes the following input fields:

- Order Online
- Book Table
- Votes
- Location
- Restaurant Type
- Dishes Liked
- Cuisines
- Cost For 2 Person
- Type

A red "Predict" button is located at the bottom of the form. Below the button, the text "Your Rating is: 4.2" is displayed.

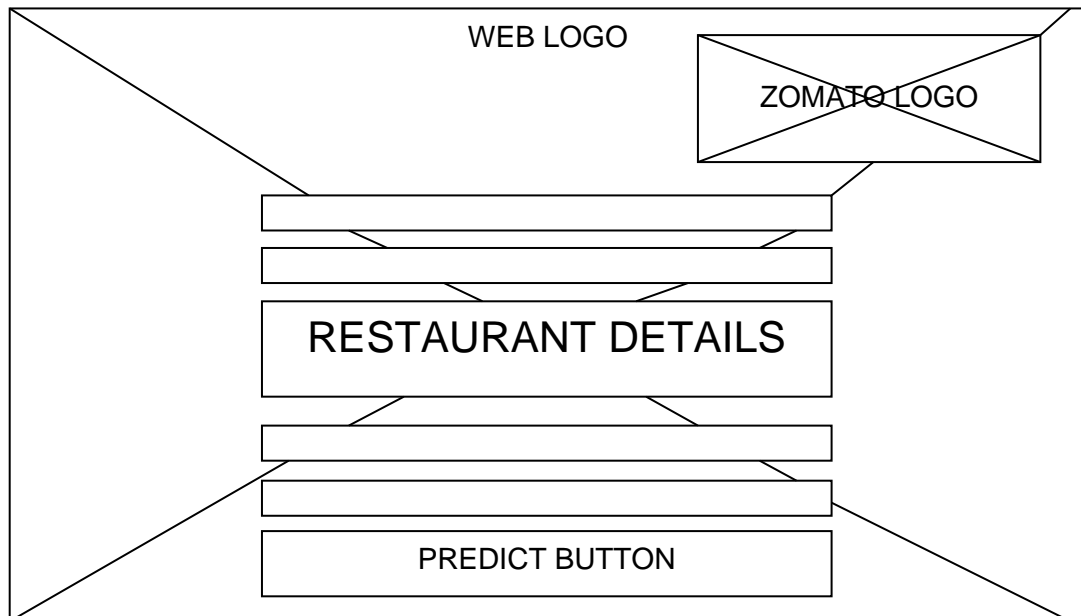

2. The User will encounter with another pop-up window showing the predicted result.

This screenshot is identical to the one above, showing the "Predict Zomato Restaurant Ratings" form on a Zomato background. It includes the same input fields: Order Online, Book Table, Votes, Location, Restaurant Type, Dishes Liked, Cuisines, Cost For 2 Person, and Type, followed by a red "Predict" button and the result "Your Rating is: 4.2".

About Page

Based on User's input, our Restaurant Rating System will show the predicted result on the next pop up. A sample view of Homepage showing results is below:

The **Crossed Sections** in above sample can be used for images of food as background to give user a good experience. Predicted result will show when all the details are filled and user hit the predict button at the bottom.
